with reusable screen images

Implementation reference

Generated 16 October 2026 from source commit **2bdfb31**. This is the current implemented UI, with fictional sample data. It does not add new product features.

Each detailed page includes all captured scrolling content. Tall artboards are intentional; zoom to read or use the saved PNG images.

Pages marked **Source-derived** show native-only or expanded branches composed from their existing source components. OS permission sheets, device chrome and physical-device acceptance are excluded.

The PDF is a visual reference, not an editable Figma component library. Text remains selectable. Future running, AI and wearables concepts are excluded.

Exercise data and illustrations: RepDB (repdb.co). Food catalog: USDA FoodData Central.

Bench Lat Stretch

Add to workout

Log exercise

Flat Bench · beginner

A kneeling stretch with the hands on a bench, sinking the chest toward the floor to lengthen the lats.

Technique

Refresh images

Latissimus Dorsi · primary

Posterior Deltoid · secondary

TECHNIQUE

1. Kneel on the floor in front of a bench.
2. Place both hands on top of the bench.
3. Sit your hips back and let your chest sink down.
4. Hold for 20 to 30 seconds, breathing steadily.

Movement: static

Training summary

2026-09-19–2026-10-16 · UTC

Uses completed sets and each workout's recorded local date. Changing or deleting a log recalculates these totals.

2 workouts · 2 training dates
4 working sets · 26 reps
Training Volume: 625 kg·reps
2 unknown-weight sets excluded from external volume.
Bodyweight has zero external load.

Training status

More context needed
Log more workouts or select a split. No missed-day or volume judgement is made from insufficient history.

Primary-muscle allocation

Sets and known external volume are divided equally across each exercise's recorded primary muscles. Missing muscle data stays Unassigned. This is a description of your logs.

Latissimus Dorsi
4 allocated sets · 625 kg·reps

Habit reminders - web

Rendered app reference | 390 px content

← Preferences

Habit reminders

Account preference: Off

Set a time and weekdays in each habit. This device schedules the next seven days, up to the earliest 48 reminders. Opening Actaro, returning to it or editing habits refreshes the schedule. Completed habits are skipped when refreshed.

Lock-screen messages stay generic. Other devices refresh when opened. Delivery can be delayed or silenced by device settings; there is no server push or background sync.

Web supports in-app due reminders only. Open Actaro on your phone to enable device notifications.

Steps & activity

Editing 2026-10-16

Activity date (YYYY-MM-DD)

2026-10-16

Open activity date

Daily steps

8400

Daily distance (km, optional)

Blank means not recorded. An explicit 0 records a zero. Save replaces this date's totals; it never adds two phones or manual and sensor counts together.

Manual daily totals are supported here. Android foreground sensor updates cannot provide a reliable full-day count; advanced sensing and health integrations are deferred.

18/30 dates with food logs

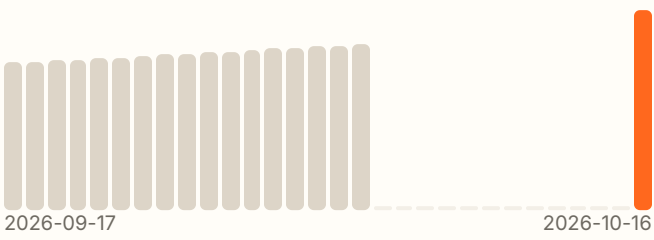

Average logged energy
1,250.6 kcal
Mean of dates with food logs

Average protein
103.9 g
Mean of dates with food logs

Protein target days
11/18
Logged dates with positive saved protein targets

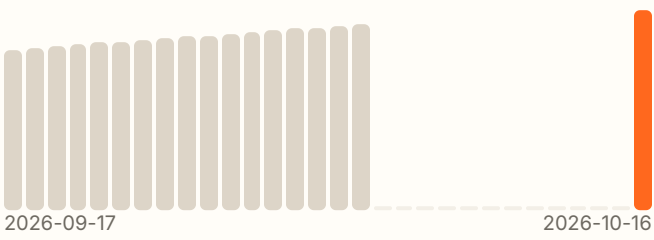

Macro adherence
97.2%
Average share of four values within ±10% of each date's targets

Logged energy

One bar per recorded date. Blank intervals remain gaps.

Logged protein

One bar per recorded date. Blank intervals remain gaps.

Only logged intake is measured; a logged day may still be incomplete. Targets use the values effective on that date. No targets means unavailable adherence.

Recorded history

Bench Lat Stretch

Bench Lat Stretch

Period best external load
65 kg

Period best estimated 1RM
75.8 kg
Epley estimate for 1–10 reps, not a tested maximum

First → latest load
+5 kg
Change in the heaviest external load recorded on those dates

Recorded sets
4
2 sets with unknown load

Daily heaviest external load

2026-09-17 — 2026-10-16
One bar per recorded date. Blank intervals remain gaps.

Daily estimated 1RM

2026-09-17 — 2026-10-16
One bar per recorded date. Blank intervals remain gaps.

Period best is not necessarily an all-time PR. Bodyweight-only and unknown loads have no external strength estimate. Compare the same exercise; changing loads or repetition ranges can change these metrics.

Recorded history

2026-10-16
Heaviest 65 kg · estimated 1RM 75.8 kg

2026-10-09
Heaviest 60 kg · estimated 1RM 70 kg

Habit reminders - native

Source-derived native branch; OS permission sheet excluded | 390 px content

← Preferences

Habit reminders

Account preference: Off

Set a time and weekdays in each habit. This device schedules the next seven days, up to the earliest 48 reminders. Opening Actaro, returning to it or editing habits refreshes the schedule. Completed habits are skipped when refreshed.

Lock-screen messages stay generic. Other devices refresh when opened. Delivery can be delayed or silenced by device settings; there is no server push or background sync.

Progress start (YYYY-MM-DD)

2026-09-17

Progress end (YYYY-MM-DD)

2026-10-16

Apply dates

2026-09-17 → 2026-10-16

18/30 dates with food logs

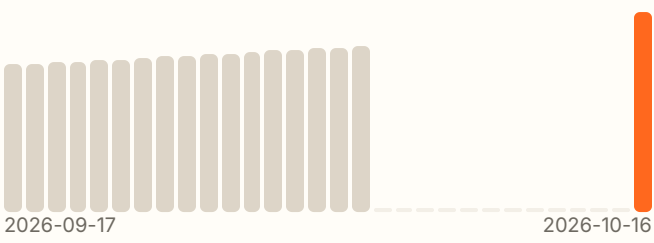

Average logged energy
1,250.6 kcal
Mean of dates with food logs

Average protein
103.9 g
Mean of dates with food logs

Protein target days
11/18
Logged dates with positive saved protein targets

Macro adherence
97.2%
Average share of four values within ±10% of each date's targets

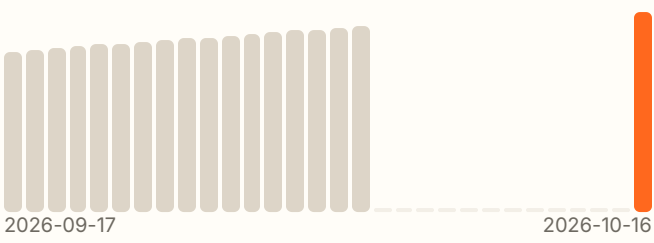

Logged energy

2026-09-17 2026-10-16

One bar per recorded date. Blank intervals remain gaps.

Logged protein

2026-09-17 2026-10-16

One bar per recorded date. Blank intervals remain gaps.

Only logged intake is measured; a logged day may still be incomplete. Targets use the values effective on that date. No targets means unavailable adherence.

Recorded history

2026-10-16
1,600 kcal · P 120 g · C 20 g · F 5 g · 100% macro adherence

2026-10-03
1,310 kcal · P 111 g · C 20 g · F 5 g · 75% macro adherence

2026-10-02
1,300 kcal · P 110 g · C 20 g · F 5 g · 75% macro adherence

2026-10-01
1,290 kcal · P 109 g · C 20 g · F 5 g · 100% macro adherence

2026-09-30
1,280 kcal · P 108 g · C 20 g · F 5 g · 100% macro adherence

2026-09-29
1,270 kcal · P 107 g · C 20 g · F 5 g · 100% macro adherence

2026-09-28
1,260 kcal · P 106 g · C 20 g · F 5 g · 100% macro adherence

2026-09-27
1,250 kcal · P 105 g · C 20 g · F 5 g · 100% macro adherence

2026-09-26
1,240 kcal · P 104 g · C 20 g · F 5 g · 100% macro adherence

2026-09-25
